## BRF Ministries announces their new digital service provider

We are delighted to announce a creative new relationship with digital services provider Glassboxx enabling readers and subscribers to download all our digital resources through the Glassboxx app on phones and tablets.

Exactly a year after our first meeting with Glassboxx at the 2024 London Book Fair we're celebrating this successful new collaboration.

### The Glassboxx app

The Glassboxx app was designed with user experience at the forefront of the developer's thinking, shortening the user journey to create a closer relationship between publishers and their readers. In just moments readers and listeners can access any digital content they have purchased from the date of publication.

Android and iOS versions of the app allow readers to access their eBooks and audiobooks on their smartphones and tablets. All content is protected and, once downloaded on Wi-Fi, can be opened offline, which makes it great for readers or listeners on the go!

### Features of the Glassboxx app

Key features include:

- Download and read or play your digital content immediately
- Once your book has been downloaded, you will be able to access it anywhere any time, even when offline
- Highlighting and annotation

Head of marketing and communications and strategic relationships, Karen Laister, says of this new development:

*'We are delighted to work with the team at Glassboxx to provide an effective solution for supply of our digital resources. Not only does the Glassboxx app offer purchasers flexibility and portability, it enables them to build their digital library of BRF resources.'*
